

1F

## Engine Coolant Level Inspection

- 1) Keep the motorcycle upright.
- 2) Lift and support the fuel tank. 
- 3) Check the engine coolant level by observing the full (1) and lower (2) lines on the engine coolant reservoir tank. If the level is below the lower line, add engine coolant to the bottom of full line from the engine coolant reservoir tank filler.

- 4) Install the reservoir tank cap by aligning the match mark (1) and reservoir tank overflow hose (2).
