

Precautions for Driveline / Axle

Refer to [General Precautions](#).

⚠ WARNING:

Never inspect or adjust the drive chain while the engine is running.

NOTICE:

- **Do not use trichloroethylene, gasoline or any similar solvent. These fluids will damage the O-rings of the drive chain.**
- **Clean the drive chain with a spray-type chain cleaner and blow dry with compressed air. If the drive chain cannot be cleaned with a spray cleaner, it may be necessary to use a kerosine. Always follow the chemical manufacturer's instructions on proper use, handling and storage.**
- **Lubricate the drive chain with a heavy weight motor oil. Wipe off any excess oil or chain lubricant. Do not use any oil sold commercially as "drive chain oil". Such oil can damage the O-rings.**
